The solution often turns out more
beautiful than the puzzle. - *Richard
Dawkins*

Finding your style is like putting
puzzle pieces together. - *Lara
Spencer*

5 tips to solve sudoku in 1 minute

1. Start with the easy numbers: Look for the numbers that appear most frequently in the puzzle and start filling them in. This will give you a good starting point and help you to see where other numbers can fit.
2. Use logic: Sudoku is a game of logic, so use it to your advantage. Look at the rows, columns, and boxes and eliminate numbers that cannot fit based on the numbers already in those sections.
3. Look for patterns: There are several patterns that can help you solve Sudoku puzzles more easily. Look for pairs, triples, and quads of numbers that can only fit in certain places. This can help you eliminate possibilities and narrow down the solution.
4. Use pencil marks: Many people find it helpful to use pencil marks to keep track of possible numbers for each square. This can help you see which numbers are still possible for a given square and make it easier to eliminate other possibilities.
5. Don't give up: Sudoku puzzles can be challenging, but don't get discouraged if you don't solve it right away. Keep working at it and use the tips above to help you along the way. With practice, you'll get better and better at solving Sudoku puzzles.

Puzzle #1

2		7		3	1	5	9	
		3	9		5	7		
9	6		4	2		8		3
